EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the SPECIFICATION, first paragraph:

Delete "This is a Continuation of Application No. 10/390,906" and replace with --This is a Divisional of Application No. 10/390,906---.

In the CLAIMS:

In claim 1, on line 5, delete "connecting said rotor," and replace with --magnetically coupling said rotor with--.

In claim 5, on the last line, delete "made of cast iron."

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: The prior art does not teach the claimed permanent magnet rotary electric machine including, inter alia, a magnetic circuit means comprising a cylindrical portion around which the inductor rotor is disposed and a base portion around which the field coil is wound, with the cylindrical portion and base portion contiguous. In particular, Akemakou does not have a magnetic circuit means comprising a contiguous cylindrical and base portions since the rotor 205 is between outer stator 201 and inner stator 211 (Figs.3-4).
